Customer Signature: _____ **Date:** _____

-Note breaker boxes cannot go on end walls. Wiring ran without outlets or light bases will require an extra charge. WE cannot use standard outlets for exterior.

-If customer adds more than the standard 4 outlets, you must add additional breakers. Each breaker will support 2 receptacles. Breaker boxes are lug boxes (no main breaker) unless upgraded to a 200-amp box.

-Outlets will be placed on closest stud.

-Customer is responsible to have Licensed electrician connect power to breaker box.
